

Analogue Insulation Testers

MODEL 3165

Analogue Insulation Tester

- 500V/1000MΩ(Model 3165)
- Expanded megohm scale for easy reading.
- New robust housing case to prevent damage.
- AC voltmeter scale for easy reading.
- Neck strap for both hand's operation.

Insulation Resistance

| | |
|-----------------------------------|--------------------|
| DC Test Voltage | 500V |
| Max. effective scale value | 1000M Ω |
| Mid-scale value | 20M Ω |
| First effective measuring range | 1 - 500M Ω |
| Accuracy | $\pm 5\%$ rdg |
| Second effective measuring ranges | 0.5/1000M Ω |
| Accuracy | $\pm 10\%$ rdg |

AC Voltage

| | |
|------------------|-------------------------------|
| AC voltage range | 600V |
| Accuracy | $\pm 3\%$ of full scale value |

General

| | |
|----------------------|---|
| Power source | R6 (AA) (1.5V) \times 4 |
| Dimensions | 90(L) \times 137(W) \times 40(D)mm |
| Weight | 330g approx. |
| Included Accessories | 7025 (Test leads) 9067 (Pouch for test lead) Neck Strap R6 (AA) \times 4 Instruction Manual |
